FOR IMMEDIATE RELEASE

DRI CERTIFIED AS HP STORAGE RESELLER

Leverages long-term relationship with HP and LeftHand Networks

INDIANAPOLIS, IN - APRIL 15, 2009 - Desktop Resources, Inc. today announced that it has been officially certified as an HP Storage Reseller. DRI has long been a partner of both HP and LeftHand Networks (the industry-leader in iSCSI-based storage). With the acquisition of LeftHand Networks by HP, DRI's strong relationships with both parties gets even stronger.

"We originally established our relationship with LeftHand Networks based on a recommendation from HP" said Tony Schafer, President and Founder of Desktop Resources, Inc. "We have been very successful in delivering business solutions to our clients from both vendors over the years, so now that HP has acquired LeftHand Networks, we look forward to even greater success in the future".

In addition to the traditional LeftHand product family, DRI's certification as an HP Storage Reseller now enables DRI to provide storage solutions from the entire breadth of HP's storage product line. Also, DRI anticipates that HP will integrate LeftHand's SANiq software across a variety of HP storage hardware in the future, which will allow DRI to leverage our engineering expertise across the entire HP storage product line.

About Desktop Resources, Inc.

Desktop Resources, Inc. was founded in 1995 by Tony Schafer, and is a leader in helping organizations couple their business initiatives with the technology to address those needs. DRI's "InformIT" managed services offerings proactively manage client infrastructure and strive to prevent problems before they occur.
